delivered by e-mail in PDF format

Dear Hinada,

Thank you very much for your help in getting me established with the *PlantARE* software back in March of this year.

I found it quite easy to get started with the planting module and had used it right away for some projects.

Only lately have I used the *PLANTUS* database more extensively, not just with the *PlantARE* software but on its own and have found it to be extremely helpful with its wealth of information. It's not just about trees and shrubs, but also about perennials, water plants and annuals.

Before purchasing *PlantARE* I had researched other high end plant databases and *AutoCAD* compatible landscape software and found them to be quite costly and burdensome. With *PlantARE* and *PLANTUS* I have two products working efficiently for a considerably better price.

I would recommend your software to any landscape architect that is trying to streamline their planting designs.

Sincerely

**Marius F.M. de BRUYN, OALA CSLA ASLA
