Ms. Hinada Neiron
Widemann Systeme
Zeppelinstraße 71-73 · 81669 München

Dear Hinada,

I just wanted to send you a quick note to let you know how impressed I am with the PlantARE / Plantus software package. It was easy to install and learn how to use, but also powerful enough to enable me to customize the program with my own symbols / data. This feature alone has saved so much time on each project I use it on.

There are other landscape programs available, but I have found them to be cumbersome, bug-ridden, overpriced, and just don't allow me to customize a drawing to where it looks like it was drawn by me. PlantARE integrates with my existing AutoCAD program flawlessly and even includes an excellent plant database program, Plantus, that allows me to label plants and create my plant lists automatically. I have not found any other software package that even compares to the excellent quality of the PlantARE and Plantus combination.

I think the best part of this purchase was the EXCELLENT support I got when I had a question about how to use the program to create my own personalized symbols. Just this one simple task enables me to provide a professional presentation of my ideas to clients on all levels, from residential landscape design to commercial landscape architecture.

There may be other programs available, but there is no comparison. PlantARE / Plantus is the ONLY way to go.

Thanks again for all your help and I look forward to working with Widemann Systeme in the future to fulfill all of my landscape design software needs.

Sincerely,

Michael Turner, R.L.A.
